

This map illustrates morphological conditions of full water bodies which are affected by morphological alterations. The exact locations of individual water body alterations are not visualised. On transboundary river water bodies, values of morphological classes are reported separately for each country and may differ from each other. In case of overlapping symbols of morphological classes, they are drawn on top of each other in this order (top to bottom): 4-5, 2-5, 3, 1-2, 1.

This ICPDR product is based on national information provided by the Contracting Parties to the ICPDR (AT, BA, BG, CZ, DE, HR, HU, MD, ME, RO, RS, SI, SK, UA) and CH. EuroGlobalMap data from EuroGeographics was used for all national borders except for AL, BA, ME where the data from the ESRI World Countries was used; Shuttle Radar Topography Mission (SRTM) from USGS Seamless Data Distribution System was used as elevation data layer; data from the European Commission (Joint Research Center) was used for the outer border of the DRBD of AL, IT, ME and PL.
